Basic RFID System

▶ *Applications of RFID*

- ▶ Electronic Surveillance
- ▶ Transaction operations
- ▶ RFID can provide effective mechanism for faster check-in and check-out of library materials.
- ▶ The users themselves there by reducing the need of library staff for such operations can operate self-operative system.

- ▶ Inventory management
- ▶ Stock verification and locating misplaced books can be done quite easily by using RFID enabled portable scanner.
- ▶ Another advantage is that an activity like stock verification can be done without even disturbing the day-to-day activities in the library.

Also an RFID enabled book sorter can help in faster sorting of books, which are returned by the users.

THANKS
