SPATIAL DISTRIBUTION OF DENGUE VECTORS

The book is original work on the extensive behavior of *Aedes* mosquitoes. The book characterizes the habitats, feeding behavior, breeding behavior, resting behavior, seasonal prevalence and abundance of *Aedes* mosquitoes with special reference to Udaipur region of southern Rajasthan, India. The study show that the seasonal abundance of dengue vectors were variables, being influenced by rainfall, temperature and humidity in this area.

Dr. Asha Ram Meena received his M.Sc., M.Phil and PhD in Zoology. Dr. Meena ten years experience of teaching and research. His main area of research includes the Biodiversity of Insects, Amphibians and Reptiles. Dr. Meena has been writing books for over few years. He has authorized many books in avian diversity and Conservation, Biodiversity of Amphibian and Reptiles, Bionomics of *Aedes* mosquito and Dengue prevention etc.
