Green Sustainable Process for Chemical and Environmental Engineering and Science

Green Solvents and Extraction Technology

1st Edition - January 11, 2023

☆☆☆☆☆ [Write a review](#)

Editors: Dr. Inamuddin, Tariq Altalhi

Paperback ISBN: 9780323951562

eBook ISBN: 9780323951579

Select country/region

Table of Contents

1. Alternative solvents in catalysis – a challenge for sustainable processes
2. Utilization of green solvents for synthesis of biodiesel
3. Chemistry of ionic liquids in multicomponent reactions
4. Green solvents in polymer synthesis
5. Click reaction in micellar media: a green and sustainable approach towards 1,2,3-triazoles synthesis
6. Industrial application of green solvent for energy conversion and storage
7. Applications of ionic liquids as green solvents in enhanced oil recovery
8. Ionic liquids: from chemistry to applications
9. The role of ionic liquids in renewable energy storage and conversion
10. Solvation within deep eutectic solvent-based systems: a review
11. Understanding green chemistry principles: a comprehensive foundation
12. Green solvents and sustainable development
13. Ionic liquids for phenolic compounds extraction
14. Polysaccharides extraction and processing using green solvents: recent developments, challenges and new opportunities

Green Sustainable Process for Chemical and Environmental Engineering and Science

Biomedical Applications of Green Composites

2023, Pages 21-34

Chapter 2 - Applications of bioresins and biopolymers derived from natural resources as composites in drug delivery

Garima Joshi^a, Khushwant S. Yadav^b

^a Department of Pharmaceutical Sciences,
Mohanlal Sukhadia University, Udaipur,
Rajasthan, India

^b Shobhaben Pratapbhai Patel School of
