Disease-Causing Seed Pathogenic Microorganisms and Their Management Practices

[Avinash Marwal](#) & [R. K. Gaur](#)

Chapter | [First Online: 27 February 2021](#)

Abstract

Seed diseases are a universal problem, and it creates pressure on limited food supplies, and therefore, employment of effective and sustainable disease management practices is quite important/necessary. There are several beneficial microorganisms which are used for better growth, survival of seed and protection against soilborne diseases and pests. The present article summarizes the currently available information on disease-causing seed pathogenic microorganisms and their management practices.
