M.K. Gandhi has emerged as a philosopher who can provide an alternative to the order that exists today in the world. Capitalist model which was declared as one which has to come to stay and has no alternatives has been criticized in those countries also where it has flourished. The conflicts growing between nations, religions and economic interest groups have brought unprecedented misery and suffering in the world. The ecology of the planet is threatened by massive pollution and social fabric is torn under pressure of chasm of inequality. The socialist model was a better alternative but it also suffered because of massive propaganda against it and its inner contradictions. Gandhi's life, his writings and other publications influenced people so much so that quite a good number of writers in English portrayed him, his ideas and his vision in literary creations. This book is a collection of research articles on the impact of Gandhi on Indian English Literature. The book presents Gandhi in the present perspective.

The recent attempts by some fringe organizations and some fundamentalist leaders to demean Gandhi by celebrating his murderers are but psychic efforts to unleash attack on a personality who is far above their reach. Gandhi remains an important philosopher not just for India but also for the world, followed and admired by people across the globe.
