|   | <b>18+0+2+0=20</b>                              | <b>18+0+0+2=20</b>                              | <b>18+0+0+2=20</b>                              | <b>18+0+0+2=20</b>                              | <b>0+18+2+0=20</b>                           | <b>0+18+0+2=20</b>                           |
| <b>72(DCC)+36(DSE/GEC)+4(AECC)+8(SEC)=120</b>   |   |   |   |   |  |  |

- Core courses (CC) : A, B, and C denote three different disciplines (subjects).** A student will study 4papers in each discipline.
  - Discipline Specific Elective (DSE):** A student will choose DSE courses from the three chosen disciplines (A, B, and C) for semesters V and VI. Any such paper can be Generic Elective Course (GEC) for the students of other disciplines.
  - Ability Enhancement Compulsory Courses (AECC) :** Modern Indian Languages (MIL), English, Hindi Communication (Odia/Hindi/Telugu/Bangla/.....)
  - Skill Enhancement Courses (SEC):** Communicative English in the 3<sup>rd</sup> semester and three more subjects from a common pool. Each discipline provide at least one SEC
  - Courses with Practical component: Theory (4 credits) + Practical (2 credits) = 6 credits
  - Non-practical Courses: Theory (5 credits) + Tutorial (1 credit) = 6 credits (Numbers shown in brackets indicate Credits). In some of the disciplines it can be (2L+2P+2T) or (2L+4P)
- In some of the disciplines it can be (2L+2P+2T) or (2L+4P).

**EVS in B.Sc. Program: Semester wise course types, Course codes, Course title, Delivery type, Workload, Credits, Marks of Examination, and Remarks if any.**

| Level | Sem | Course Type | Course Code | Course Title                                     | Delivery Type |   |   | Total Hours | Credit | Total Credit | Internal Assessment | EoS Exam | M.M. | Remarks |

\* Any experiment which is set by the faculty relating to the course content may also be added.

\*\* A minimum of 50% of the total admitted strength is required to run the options of papers as proposed in Semester V and VI ( DSE-T & DSE-LAB) papers in UG Programme

## U.G (TDC) PROGRAMME under NEP SCHEME SYLLABUS (2023-2024)

| <b>B.Sc. (Three Years Degree Program)</b> |  |
|---|--|
| <b>First Semester</b>                     |  |
| <b>Subject-Environmental Sciences</b>     |  |
| <b>Code of the Course</b>                 | <b>EVS5000T</b>  |
| <b>Title of the Course</b>                | <b>FUNDAMENTALS OF ECOLOGY, ENVIRONMENT &amp; EVOLUTION</b>  |
| <b>Qualification Level of the Course</b>  | NHEQF Level 4.5  |
| <b>Credit of the course</b>               | 4  |
| <b>Type of the course</b>                 | Discipline Centric Compulsory Course (DCC) in EVS  |
| <b>Delivery type of the Course</b>        | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity   |
| <b>Prerequisites</b>                      | SCIENCE, biology stream of XII standard IN ANY BOARD   |
| <b>Co-requisites</b>                      | None   |
| <b>Objectives of the course</b>           | to develop the concept and understanding of Ecology, its relationship with Environment and able to appreciate the holistic relationship with evolution   |
| <b>Learning outcomes</b>                  | Have developed the knowledge of multidisciplinary outcomes and have an idea of professional learning for the subject   |
| <b>Syllabus</b>                           |  |
| <b>UNIT I</b>                             | Ecology : Definition, concept, scope and branches; Autecology, Synecology; Historical background of ecology : Ecology in Indian classics, in ancient Greek and Roman Literature, growth of ecology from 12 <sup>th</sup> to 20 <sup>th</sup> Century; Growth of plant as well as Animal Ecology in India; landscape, habitat, ecozones. (12 lectures)  |
| <b>UNIT II</b>                            | Environment: Natural processes – Primeval atmosphere and origin of life; Structure and composition of present day atmosphere; atmosphere and earth radiation balance; Hydrosphere: atmospheric humidity and precipitation, hydrological cycle. Lithosphere – soil formation, soil texture, soil profile, soil classification, Biosphere - Definition, boundaries of biosphere. (12 lectures) |
| <b>UNIT III</b>                           | Paleontology and evolutionary History; evolutionary time scale; eras, periods and epoch; major events in the evolutionary time scale; origins of unicellular and multi cellular organisms; major groups of plants and animals; stages in primate evolution including Homosepians. (12 lectures)  |
| <b>UNIT IV</b>                            | Evolution and Ecology – evidences and theories of organic evolution; Lamarck’s concept of evolution; Darwin’s Evolutionary Theory: variation, adaptation, struggle, fitness and natural selection; Mendelism; spontaneity of mutations;  |

|                        |  |
|------------------------|--|
|                        | Evolution of Man. (12 lectures)  |
| <b>UNIT V</b>          | Introduction to Taxonomy: Taxonomic Principles; Procedure of classification; Linear classification of plants and animals up to generic groups. (12 lectures)   |
| <b>Text Books</b>      | <ul style="list-style-type: none"> <li>• R.S.AMBASHT : ECOLOGY</li> <li>• SUBHRAMANYAM AND SAMBHAMURTHI : ECOLOGY</li> <li>• ECOLOGY AND ENVIRONMENT – PD SHARMA</li> <li>• S C SANTRA – ENVIRONMENTAL SCIENCE</li> </ul>  |

| <b>Delivery type of the Course</b>              | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity, |
| <b>Prerequisites</b>                            | SCIENCE, biology stream of XII standard   |

|                                 |  |
|---------------------------------|--|
| <b>Co-requisites</b>            | None   |
| <b>Objectives of the course</b> | to develop the understanding of basics of the core subject   |
| <b>Learning outcomes</b>        | Have an idea about concept and components of environment and hierarchy in Environmental biology  |
| <b>Syllabus</b>                 |  |
| <b>UNIT I</b>                   | Introduction of Environmental Biology, its interdisciplinary nature; Concept of Ecosphere and Biosphere, Major biomes of the world: Forest, savannah, grassland, desert and tundra biomes. Flora and vegetation of India; vegetation of Rajasthan. (12 Lectures)   |
| <b>UNIT II</b>                  | Ecological factors in relation to plants and animals – their concept, significance- light, temperature, topography, precipitation and edaphic variables.<br>Ecological adaptation in plants- Xerophytes, hydrophytes, halophytes; their adaptations and ecotypes; Plant indicators. Animal fitness to habitats - fossorial, arboreal, aquatic and volant adaptations. Strategies of adaptation in plants and animals. (12 lectures)  |
| <b>UNIT III</b>                 | Species ecology - Liebig's Law of the Minimum; Shelford's Law of Tolerance;<br>Phenotypic plasticity; ecotypes; ecoclines; acclimation; ecological niche; types of niche: Eltonian niche, Hutchinsonian niche, fundamental niche, realized niche; thermoregulation; Interspecific interactions - Commensalism, Amensalism, Mutualism, Protocooperation, Symbiosis, Predation, Parasitism, Competition, Epiphytism; Types of association-Colonization, Aggregation, Social organization and behavior. (12 lectures) |
| <b>UNIT IV</b>                  | Population Ecology: Definition, characteristics; population dynamics- growth forms and concept of carrying capacity, population regulation. (12 lectures)  |
| <b>UNIT V</b>                   | Community ecology - concept; characteristics- analytical characteristics - quantitative, qualitative and synthetic; IVI and concept of ecological dominance; Methods of studying vegetation, gradient analysis and continuum concept, ecotone and edge effect; Species diversity and indices; community classification; Ecological succession-Types, cause and processes, significance ; concept of climax. (12 lectures)  |
| <b>Text Books</b>               | <ul style="list-style-type: none"> <li>• VERMA AND AGARWAL: ENVIRONMENTAL BIOLOGY. S.CHAND AND CO. **EXIT WITH CERTIFICATE**

**B.Sc. (Three Years Degree Program)****Third semester (Environmental Sciences)**

|  |   |
|--|---|
| <b>Code of the Course</b>                | <b>EVS6002T</b>   |
| <b>Title of the Course</b>               | <b>ELEMENTS OF ECOSYSTEM ECOLOGY</b>  |
| <b>Qualification Level of the Course</b> | NHEQF Level 5.0   |
| <b>Credit of the course</b>              | 4   |
| <b>Type of the course</b>                | Discipline Centric Compulsory Course (DCC) in EVS   |
| <b>Delivery type of the Course</b>       | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity, problem solving.  |
| <b>Prerequisites</b>                     | Passed Certificate course in Environmental Sciences   |
| <b>Co-requisites</b>                     | None  |
| <b>Objectives of the course</b>          | To understand the details of different ecosystems on earth  |
| <b>Learning outcomes</b>                 | Understanding the relationship of several ecosystems and their balance with other components of environment   |
| <b>Syllabus</b>                          |   |
| <b>UNIT I</b>                            | Ecosystem – concept, its structure and function, homeostasis in the ecosystem; Energy flow in ecosystems, food chains, food webs, trophic levels, ecological pyramids, ecological efficiencies. (11 lectures)   |
| <b>UNIT II</b>                           | Aquatic Ecology – Physico-chemical characteristics; lentic and lotic habitats; Definition and general account of lakes; origin of lakes, classification of lakes; Productivity and fertility of lakes; ecological zonation in the lake environment; Eutrophication. Biotic communities of lakes: Plankton, Benthos, Nekton and Neuston, Diversity and Biomass of plankton and benthos in time and space, aquaculture. (13 lectures)                                 |
| <b>UNIT III</b>                          | Marine Ecology – Features of marine environment, zonation, biotic communities; Brief account of pelagic, coastal, deep sea, coral reefs and mangrove communities; Marine resources. Estuarine ecology- Definition and types, biota and productivity. Ecological adaptation in estuarine environment. (11 lectures)  |
| <b>UNIT IV</b>                           | Terrestrial ecology- physico-chemical characteristics; Grassland ecosystem –main features, food chain and trophic levels, 10nergetic and productivity of grassland; biogeochemical cycles operating in grasslands; grass legume association; Grasslands in relation to soil and water conservation; Basis of grassland classification; Major grassland types in the world; grasslands in India with special reference to Rajasthan; Range management. (13 lectures) |
| <b>UNIT V</b>                            | Forest ecosystem – Major forest types of the world and of India; forest environment and zonation, food chains, 10nergetic and biogeochemical cycles operating in forest system, Forest biota.<br>Desert ecosystem – Introduction to world deserts; climate of desert; Ecological adaptations of desert in plants and animals. Flora and fauna of Indian desert; causes of Desertification and control. (12 lectures)  |

| <b>Fourth semester (Environmental Sciences)</b> |  |
|---|--|
| <b>Code of the Course</b>                       | <b>EVS6003T</b>  |
| <b>Title of the Course</b>                      | <b>NATURAL PROCESSES OF EARTH AND CLIMATE CHANGE</b>   |
| <b>Qualification Level of the Course</b>        | NHEQF Level 5.0  |
| <b>Credit of the course</b>                     | 4  |
| <b>Type of the course</b>                       | Discipline Centric Compulsory Course (DCC) in EVS  |
| <b>Delivery type of the Course</b>              | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity,  |
| <b>Prerequisites</b>                            | Passed Certificate course in Environmental Sciences  |
| <b>Co-requisites</b>                            | None   |
| <b>Objectives of the course</b>                 | <ul style="list-style-type: none"> <li>• Evaluate characteristics of Environmental meteorology and factors related to geographical, geological and climate change</li> <li>• To analyze the geodynamic elements of earth.</li> </ul> |
| <b>Learning outcomes</b>                        | Apply systems concepts and methodologies to analyze and understand interactions between different environmental and geological processes.  |

| <b>Syllabus</b>        |   |
|------------------------|---|
| <b>UNIT I</b>          | Understanding the meteorological parameters and their characteristics -temperature, humidity, rainfall, wind speed and direction, sunshine, intensity, atmospheric pressure, cloud cover; scales of meteorology; forecasting of meteorological information (12 lectures)  |
| <b>UNIT II</b>         | Climatology: Elements of weather and climate, Climatic controls, Climatic variability and climate change. Elementary ideas about weather systems and their variations; Heat balance of the earth atmosphere system, Earth as a heat engine; Weather system: Tropical systems– equatorial trough, ITCZ, jet streams, vortices. (12 lectures)   |
| <b>UNIT III</b>        | Biogeochemical cycles with special reference to water, oxygen, nitrogen, carbon, phosphorus and sulphur. Clouds - definition, formation and types. Precipitation- types, forms (rain, drizzle, sleet, hail, snow) ; formation of precipitation, dew, fog and clouds; Atmospheric moisture, humidity, condensation; atmospheric stability, adiabatic process. Monsoon - Meaning, origin, Indian monsoon (Bay of Bengal branch and Arabian Sea branch) and significance. El-Nino, La-Nina- concept and mechanism. (12 lectures)   |
| <b>UNIT IV</b>         | Earth and sun relations - rotation, revolution and seasons; Energy, radiation, temperature and heat; Solar radiation - Concept of insolation and heat budget. Pressure- pressure belts, wind and Atmospheric circulation. Temperature – Horizontal distribution, lapse rate - concept and types; Temperature inversion - concept and types, Humidity -definition and types. Wind - origin and Earth's surface wind system (doldrums, trade wind belt, prevailing westerlies, and polar easterlies). (12 lectures)   |
| <b>UNIT V</b>          | Climate classification of world; Climate of India: Physiography, spatial and temporal patterns of climatic parameters - temperature, rainfall and its variability in India with special reference to NE India. (12 lectures)  |
| <b>Text Books</b>      | <ul style="list-style-type: none"> <li>• PRINCIPLES OF ECOLOGY P. S. VERMA,V. K. AGARWAL ( S. CHAND AND CO. NEW DELHI )</li> <li>• ECOLOGY AND ENVIRONMENT BY P.D. SHARMA</li> <li>• A. K. DE – ENVIRONMENTAL CHEMISTRY</li> <li>• CLIMATOLOGY – SAVINDRA SINGH</li> </ul>  |

### EXIT WITH B. Sc. DIPLOMA

|   |   |
|---|---|
| <b>B.Sc. (Three Years Degree Program)</b> |   |
| <b>FIFTH SEMESTER</b>                     |   |
| <b>Subject-Environmental Sciences</b>     |   |
| <b>Code of the Course</b>                 | <b>EVS7100T</b>   |
| <b>Title of the Course</b>                | <b>POLLUTION ECOLOGY</b>  |
| <b>Qualification Level of the Course</b>  | NHEQF Level 5.5   |
| <b>Credit of the course</b>               | 4   |
| <b>Type of the course</b>                 | Discipline Specific Elective Course (DSE) in EVS  |
| <b>Delivery type of the Course</b>        | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity, |
| <b>Prerequisites</b>                      | Having B.Sc. diploma in environmental sciences  |

|                                 |   |
|---------------------------------|---|
| <b>Co-requisites</b>            | None  |
| <b>Objectives of the course</b> | <ul style="list-style-type: none"> <li>• Perform procedure for qualitative and quantitative analysis of pollutants.</li> <li>• Assess the effects of pollutants and suggest the control and preventive measures for environment.</li> </ul>   |
| <b>Learning outcomes</b>        | Identify sources, nature and effects of pollutants on global and local environment  |
| <b>Syllabus</b>                 |   |
| <b>UNIT I</b>                   | Definition of pollution; pollutants- their classification, Solubility (hydrophilic and lipophilic pollutants), transfer of pollutants within different mediums, role of chelating agents in transferring pollutants, concept of biotransformation and bioaccumulation; concept of radioactivity, radioactive decay and half-life of pollutants, organometallic compounds, acid mine drainage (12 Lectures)  |
| <b>UNIT II</b>                  | Ambient air quality- monitoring and standards (National Ambient Air Quality Standards of India); Air quality index; sources and types of air pollutants (primary and secondary), smog; effects of different pollutants on human health (NO <sub>x</sub> , SO <sub>x</sub> , PM, CO, CO <sub>2</sub> , hydrocarbons and VOCs) and control measures; indoor air pollution: sources and effects on human health. Acid rain, Fly ash, Aerosols, Green House Effect, global warming (12 Lectures)  |
| <b>UNIT III</b>                 | Water pollution – kinds (municipal water pollution, municipal sewers and sewage; Industrial and commercial water pollution); Safe drinking water; water quality parameters and standards; Sources of surface and ground water pollution; organic waste and eutrophication; COD, BOD, DO; effect of water contaminants on human health (nitrate, fluoride, arsenic, chlorine, cadmium, mercury, pesticides); water borne diseases (12 Lectures)  |
| <b>UNIT IV</b>                  | Land Pollution – Effects of agrochemicals – herbicides, pesticides and fertilizers; Mining and smelting. Radioactive pollution – Radiation and their types – non- ionizing and ionizing radiations; sources in environment, effects on man, animals and plants; Prevention. Causes of soil pollution and degradation; effect of soil pollution on environment, vegetation and other life forms; control strategies. (12 Lectures)   |
| <b>UNIT V</b>                   | Noise pollution – sources; frequency, intensity and permissible ambient noise levels; effect on communication, impacts on life forms and humans - working efficiency, physical and mental health; control measures. Radioactive material and sources of radioactive pollution; effect of radiation on human health (somatic and genetic effects); Thermal pollution and its effects. Marine resources and their importance; sources of marine pollution; oil spill and its effects; coral reefs and their demise; coastal area management (12 Lectures) |
| <b>Text Books</b>               | <ul style="list-style-type: none"> <li>• K.C.AGARWAL: ENVIRONMENTAL POLLUTION - CAUSES EFFECTS AND CONTROL, NIDHI PUBLISHERS, BIKANER.</li> <li>• ENVIRONMENTAL POLLUTION - TIMMY KATYAL</li> <li>• M.P. | <b>FIFTH SEMESTER</b>                    |  |
|--|--|
| <b>Subject-Environmental Sciences</b>    |  |
| <b>Code of the Course</b>                | <b>EVS7101T</b>  |
| <b>Title of the Course</b>               | <b>TOXICOLOGY</b>  |
| <b>Qualification Level of the Course</b> | NHEQF Level 5.5  |
| <b>Credit of the course</b>              | 4  |
| <b>Type of the course</b>                | Discipline Specific Elective Course (DSE) in EVS   |
| <b>Delivery type of the Course</b>       | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity,  |
| <b>Prerequisites</b>                     | Having B.Sc. diploma in environmental sciences   |
| <b>Co-requisites</b>                     | None   |
| <b>Objectives of the course</b>          | To have awareness of natural toxicity, toxic components and their magnification in environment   |
| <b>Learning outcomes</b>                 | Have concept of toxicity of contaminants present in environment and their detrimental impacts  |
| <b>Syllabus</b>                          |  |
| <b>UNIT I</b>                            | Definition of Toxicology, toxic substances in the environment; Concept of dose-response relationship; acute toxicity, chronic toxicity, lethal concentration, effective concentration, median tolerance limits . (12 Lectures) |
| <b>UNIT II</b>                           | Metabolism of toxic substances by animals – uptake, excretion, chemical localization and its consequences; hepatic metabolism; Synergistic and Antagonistic effects. (13 Lectures)   |
| <b>UNIT III</b>                          | Metabolism of toxic substances by plant – uptake, translocation, metabolism and excretion, pathogen toxins, herbicides; Atmospheric toxicants and plants; Algal toxins, Mycotoxins. (13 Lectures)                              |
| <b>UNIT IV</b>                           | Environmental factors in human health; Occupational hazards and diseases and their prevention. Food poisoning, toxicity of drugs, antibiotics, pesticides, metals; drug allergies (11 Lectures)                                |
| <b>UNIT V</b>                            | Teratogenecity, carcinogenesis and brief idea of genotoxicity<br>Fumacatories and masticatories – sources, uses, effects on human body and evil effects on the society. (11 Lectures)  |
| <b>Text Books</b>                        | <ul style="list-style-type: none"> <li>• P.D.SHARMA : ENVIRONMENTAL TOXICOLOGY</li> <li>• M. SATAKE – ENVIRONMENTAL TOXICOLOGY</li> </ul>  |

|                                     |  |

| <b>(Semester V) SKILL ENHANCEMENT COURSE</b> |  |
| <b>Code of the Course</b>                    | <b>SES7341T</b>  |
| <b>Title of the Course</b>                   | <b>FIRE HAZARD AND MANAGEMENT IN INDUSTRY</b>  |
| <b>Qualification Level of the Course</b>     | NHEQF Level 5.5  |
| <b>Credit of the course</b>                  | 02   |
| <b>Type of the course</b>                    | Skill enhancement course (SES) in Environmental Sciences   |
| <b>Delivery type of the Course</b>           | Lecture, 20+10=30. The 20 lectures for content delivery and 10 hours on tutorial assessment, formative assessment and subject/class activity,  |
| <b>Objectives of the course</b>              | To learn about fire as serious industrial hazard and its abatement measures  |
| <b>Learning outcomes</b>                     | Student will be able to understand and learn the skill to mitigate the hazards related to occupational injury i.e. fire, its associated risk factors and related preventive Practices  |
| <b>Syllabus</b>                              |  |
| <b>UNIT I</b>                                | <b>Introduction to Fire and Safety</b> : Introduction to fire and safety in industrial settings; Historical perspective of industrial fires and accidents; Fire and safety regulations and standards; Fire triangle and basic fire chemistry; Common fire hazards in industries. (6 lectures)  |
| <b>UNIT II</b>                               | <b>Fire Prevention and Risk Assessment:</b> Principles of fire prevention and risk assessment; Hazard identification and risk analysis; Fire safety management systems; Emergency planning and evacuation procedures; Fire prevention strategies and practices in industries. (6 lectures)   |
| <b>UNIT III</b>                              | <b>Fire Detection and Suppression Systems</b> : Types of fire detection systems (heat, smoke, flame detectors); Fire alarm systems and their components; Fire suppression methods (water-based, gas-based, foam systems); Firefighting equipment and their usage; Inspection and maintenance of fire detection and suppression systems. (6 lectures) |
| <b>UNIT IV</b>                               | <b>Industrial Safety Practices</b> :Industrial safety regulations and compliance; Personal protective equipment (PPE) and its selection; Safety training and awareness programs; Hazardous materials handling and storage;   |

|                        |   |
|------------------------|---|
|                        | Accident investigation and reporting. (6 lectures)  |
| <b>UNIT V</b>          | <b>Emergency Response and Crisis Management</b> :Emergency response plans and procedures; Evacuation drills and procedures; Crisis communication and coordination; Post-incident analysis and improvement. (6 lectures)   |
| <b>Reference Books</b> | <ul style="list-style-type: none"> <li>Disaster management Vol 1 -G.K.Ghosh</li> </ul>  |

| <b>B.Sc. (Three Years Degree Program)</b> |   |
| <b>SIXTH SEMESTER</b>                     |   |
| <b>Subject-Environmental Sciences</b>     |   |
| <b>Code of the Course</b>                 | <b>EVS7102T</b>   |
| <b>Title of the Course</b>                | <b>NATURAL RESOURCE CONSERVATION</b>  |
| <b>Qualification Level of the Course</b>  | NHEQF Level 5.5   |
| <b>Credit of the course</b>               | 4   |
| <b>Type of the course</b>                 | Discipline Specific Elective Course (DSE) in EVS  |
| <b>Delivery type of the Course</b>        | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity  |
| <b>Prerequisites</b>                      | Having B.Sc. diploma in environmental sciences  |
| <b>Co-requisites</b>                      | None  |
| <b>Objectives of the course</b>           | Gain in-depth knowledge about the concept of ecosystem and natural resources  |
| <b>Learning outcomes</b>                  | <ul style="list-style-type: none"> <li>Apply the environmental conservation strategies.</li> <li>Develop professional knowledge in the areas of biodiversity conservation and natural resource management.</li> <li>Critically assess different natural resource management projects, policies and planning at different levels.</li> </ul> |

## Syllabus

|                        |   |
|------------------------|---|
| <b>UNIT I</b>          | Natural resources and reserves; classification of natural resources; renewable and non-renewable resources; resource degradation; resource conservation; resource availability and factors influencing its availability; Human impact on natural resources; ecological, social and economic dimension of resource management. (11 Lectures)   |
| <b>UNIT II</b>         | Land as a resource – types; drivers of land degradation - deforestation, desertification; habitat loss, loss of biodiversity; land salinization; human population pressure, poverty, socio-economic and institutional factors; visual indicators of land degradation. (11 Lectures)   |
| <b>UNIT III</b>        | Mineral resources and the rock cycle; identified resources; undiscovered resources; reserves; types of mining-surface, subsurface, open-pit, dredging, strip; reserve-to-production ratio; global consumption patterns of mineral resources ; techniques to increase mineral resource supplies; ocean mining for mineral resources; environmental effects of extracting and using mineral resources. (13 Lectures)  |
| <b>UNIT IV</b>         | Forest resources: economic and ecological importance of forests, forest management strategies, sustainable forestry; Symbiotic relationship between tribals and forest, community participation in forest management; case study of Chipko movement; sacred groves forests; India’s Bishnoi community and their conservation practices; conservation of indigenous culture and traditions.<br>Water resources: supply, renewal and use of water resources, freshwater shortages, strategies of water conservation; fisheries and other marine resources; aquaculture. (13 Lectures)   |
| <b>UNIT V</b>          | Soil - ecological and economic importance of soil; types and causes of soil degradation; impact of soil loss and soil degradation on agriculture and food security; need for soil conservation and restoration of soil fertility. Range management and their conservation; range land degradation.<br>Food resources: world food problem, techniques to increase world food production, green revolution. (12 Lectures)   |
| <b>Text Books</b>      | <ul style="list-style-type: none"> <li>• V. RAGHUPATHY – NATURAL RESOURCES</li> <li>• ENVIRONMENTAL AWARENESS – ANNETTE BALGARE</li> <li>• ENVIRONMENTAL ENERGY RESOURCES –SR MANJUNATHA</li> <li>• Jerry L. Holechek cales, Fisher- Natural Resources</li> </ul>   |

**OR**

| <b>SIXTH SEMESTER (Environmental Sciences)</b> |   |
|--|---|
| <b>Code of the Course</b>                      | <b>EVS7103T</b>   |
| <b>Title of the Course</b>                     | <b>BIODIVERSITY CONSERVATION</b>  |
| <b>Qualification Level of the Course</b>       | NHEQF Level 5.5   |
| <b>Credit of the course</b>                    | 4   |
| <b>Type of the course</b>                      | Discipline Specific Elective Course (DSE) in EVS  |
| <b>Delivery type of the Course</b>             | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity  |
| <b>Prerequisites</b>                           | Having B.Sc. diploma in environmental sciences  |
| <b>Co-requisites</b>                           | None  |
| <b>Objectives of the course</b>                | To sensitize students towards basics of biodiversity in India and world and its conservation  |
| <b>Learning outcomes</b>                       | Have developed an understanding of the biodiversity resources, its economic value, wildlife and their conflicts, the pressures faced by habitat loss, man and animal conflicts and cultivate an insight into the conservation practices.  |
| <b>Syllabus</b>                                |   |
| <b>UNIT I</b>                                  | Concept of biological diversity; biodiversity hotspots; India as a mega diversity nation; phytogeographic and zoogeographic zones of the country; National Biodiversity Action Plan. (12 Lectures)  |
| <b>UNIT II</b>                                 | Interpretive phytogeography. Endemic areas and theories of endemism; Endemic flora of India. Zoogeographical regions – Palaearctic, Nearctic, Neotropical, Ethiopian, Oriental, Australian region, Dynamic biogeography – Dispersal dynamics, barriers, dispersal pathways, continental drift theory, land bridge, centre of origin, age and area hypothesis; Migration. (12 Lectures)                  |
| <b>UNIT III</b>                                | Threats to biodiversity: Natural and anthropogenic disturbances; habitat loss, habitat degradation and habitat fragmentation; Impact of climate change, pollution, invasive species, hunting, over-exploitation, land use changes, overgrazing, hydropower development and deforestation; man wildlife conflicts; consequences of biodiversity loss; Intermediate Disturbance Hypothesis. (12 Lectures) |

|                        |   |
|------------------------|---|
| <b>UNIT IV</b>         | Conservation of biological diversity- In-situ conservation (Biosphere Reserves, National Parks, Wildlife Sanctuaries); Ex-situ conservation (botanical gardens, zoological gardens, gene banks, seed and seedling banks, pollen culture, tissue culture and DNA banks), role of local communities and traditional knowledge in conservation.<br>Biodiversity hotspots; IUCN Red List categorization – guidelines, practice and application; Red Databook; ecological restoration; afforestation; social forestry; agro forestry; joint forest management. (12 Lectures) |
| <b>UNIT V</b>          | Economic values of biodiversity – social, aesthetic, consumptive, and ethical values of biodiversity; Eco-conservation of Aravali; Role of UNEP, IUCN, ELC and WWF in conservation of nature and natural resources; scheme and labeling of environment friendly products, Ecomarks; Article 48A; Article 51 A; Stockholm Conference 1972, Rio Declaration, Agenda 21, Montreal Protocol 1987; Kyoto Protocol 1997; Copenhagen and Paris summits; Ramsar convention. (12 Lectures)   |
| <b>Text Books</b>      | <ul style="list-style-type: none"> <li>• ECOLOGY, ENVIRONMENT AND RESOURCE CONSERVATION. SINGH, J. S., SINGH, S.P. &amp; GUPTA, S. 2006. |--|-------------------------|
| <b>SIXTH SEMESTER (Environmental Sciences)</b> |                         |
| <b>Code of the Course</b>                      | <b>EVS7104T</b>         |
| <b>Title of the Course</b>                     | <b>WASTE MANAGEMENT</b> |
| <b>Qualification Level of the Course</b>       | NHEQF Level 5.5         |

|                                    |   |
|------------------------------------|---|
| <b>Credit of the course</b>        | 4   |
| <b>Type of the course</b>          | Discipline Specific Elective Course (DSE) in EVS  |
| <b>Delivery type of the Course</b> | Lecture, 40+20=60. The 40 lectures for content delivery and 20 hours on diagnostic assessment, formative assessment and subject/class activity, problem solving.  |
| <b>Prerequisites</b>               | Having B.Sc. diploma in environmental sciences  |
| <b>Co-requisites</b>               | None  |
| <b>Objectives of the course</b>    | To develop knowledge of quantification and characteristics of solid waste and their management.<br>Be able to understand the handling techniques and legislations governing wastes.   |
| <b>Learning outcomes</b>           | Develop skills required for managing different kinds of solid wastes.   |
| <b>Syllabus</b>                    |   |
| <b>UNIT I</b>                      | Solid waste - Source and generation, their classification and chemical composition; characterization of municipal solid waste, hazardous waste and biomedical waste; Impact of solid waste on environment, humans and plant health; Effect of solid waste and industrial effluent discharge on water quality and aquatic life; Mining waste and land degradation; Effect of landfill leachate on soil characteristics and ground water pollution. (12 Lectures) |
| <b>UNIT II</b>                     | Different techniques used in collection, storage, transportation and disposal of solid waste (municipal, hazardous and biomedical waste); Landfill (traditional and sanitary landfill design); Thermal treatment (pyrolysis and incineration) of waste material; Drawbacks in waste management techniques. (12 Lectures)  |
| <b>UNIT III</b>                    | Types of industrial waste- hazardous and non-hazardous; effect of industrial waste on air, water and soil; Industrial waste management and its importance; Stack emission control and emission monitoring; Effluent treatment plant and Sewage treatment plant (12 Lectures)  |
| <b>UNIT IV</b>                     | 4R- reduce, reuse, recycle and recover; Biological processing - composting, anaerobic digestion, aerobic treatment; reductive dehalogenation; mechanical biological treatment; green techniques for waste treatment; Concept of energy recovery from waste; refuse derived fuel (RDF); different WTE processes: combustion, pyrolysis, landfill gas (LFG) recovery; anaerobic digestion; gasification. (12 Lectures)  |
| <b>UNIT V</b>                      | Concept of Integrated waste management; waste management hierarchy; methods and importance of Integrated waste management. Municipal Solid Wastes (Management and Handling) Rules 2000; Hazardous Wastes Management and Handling Rules 1989; Bio-Medical Waste (Management and Handling) Rules 1998; Eco friendly or green products (12 Lectures)   |
| <b>Text Books</b>                  | <ul style="list-style-type: none"> <li>• WASTE MANAGEMENT – RAJIV K SINHA</li> <li>1. RAKESH KUMAR- MUNICIPAL WATER AND WASTE WATER TREATMENT</li> </ul>  |

|                        |  |
|------------------------|--|
| <b>Reference Books</b> | <ul style="list-style-type: none"> <li>• INTEGRATED SOLID WASTEMANAGEMENT: A LIFE CYCLE INVENTORY. MCDOUGALL, F. R., WHITE, P. R., FRANKE, M., &amp; HINDLE, P. 2008. JOHN WILEY &amp; SONS.</li> <li>• INDUSTRIAL WASTES – WILLE RUDOLFS</li> </ul> |
|                        | <ul style="list-style-type: none"> <li>• 1511172529Paper_11_module_1_yoga_etext.pdf</li> <li>• 1522921989paper11_module_4_etext.pdf</li> <li>• 1511170431Paper_11_module_31_yoga_etext.pdf</li> </ul>  |

| <b>(Semester VI) PRACTICAL LAB-VI</b> |  |
|---------------------------------------|--|
| <b>Code of the Course</b>             | <b>EVS7104P</b>  |
| <b>Title of the Course</b>            | <b>Waste Analysis Lab</b>  |
| <b>Credit of the course</b>           | 04   |
| <b>Learning outcomes</b>              | To have basic knowledge of wastes,its analysis and their mitigation process  |
| <b>EXPERIMENT DETAILS</b>             |  |
|                                       | <ol style="list-style-type: none"> <li>I. To segregate domestic waste into bio-degradable and non-biodegradable components</li> <li>II. Sampling and chemical analysis of wastewater/polluted soil/sediment</li> <li>III. To visit a solid-waste management site and record observations</li> <li>IV. To visit a waste- water management site and prepare a report</li> <li>V. To prepare a report on various types of local industrial effluents</li> <li>VI. Choose five common species of Trees / plants from your NEIGHBORHOOD and list their common and scientific names. Describe each plant in terms of its ecological significance</li> <li>VII. To study local sources and types of industrial waste.</li> <li>VIII. Visit to waste water treatment plant and submission of report</li> </ol> |
|                                       | <b>Spotting:</b><br>Based on the experiments   |

|   |   |
|---|---|
| <b>Reference Books</b>                        | ➤ J. Pandey and M. S. Sharma: Environmental Science: Practical and Field Manual, Yash Publications, Bikaner.  |
| <b>EoSE</b>                                   | <ul style="list-style-type: none"> <li>• Internal assessment – 20 marks</li> <li>• External assessment- 80 marks (Major I- 20; Minor I- 15; Minor II-10; Spotting- 20; Viva- 10 ; Record- 05 marks)</li> </ul>  |
| <b>(Semester VI) SKILL ENHANCEMENT COURSE</b> |   |
| <b>Code of the Course</b>                     | <b>SES7342T</b>   |
| <b>Title of the Course</b>                    | <b>Industrial health and Safety</b>   |
| <b>Qualification Level of the Course</b>      | NHEQF Level 5.5   |
| <b>Credit of the course</b>                   | 02  |
| <b>Type of the course</b>                     | Skill enhancement course (SES) in Environmental Sciences  |
| <b>Delivery type of the Course</b>            | Lecture, 20+10=30. The 20 lectures for content delivery and 10 hours on tutorial assessment, formative assessment and subject/class activity,   |
| <b>Objectives of the course</b>               | To learn about the work ethics and safety in industrial set up  |
| <b>Learning outcomes</b>                      | One can be well aware of occupational health hazards, safety practices and an emerging concept of industry  |
| <b>Syllabus</b>                               |   |
| <b>UNIT I</b>                                 | <b>Introduction to Health and Safety in Industries</b> : Understanding the Significance of Health and Safety in Industrial Settings; Historical Overview of Industrial Accidents and Their Impact ; Legislation and Regulatory Framework for Industrial Health and Safety ; Roles and Responsibilities of Employers, Employees, and Regulatory Bodies ;Safety Culture and Its Influence on Workplace Safety ;Risk Assessment and Hazard Identification in Industrial Environments . ( 6 lectures)   |
| <b>UNIT II</b>                                | <b>Occupational Health and Hygiene in Industries:</b> Common Occupational Health Hazards: Chemical, Physical, Biological, Ergonomic, and Psychosocial ; Methods for Assessing and Monitoring Workplace Exposures ;Occupational Diseases and Disorders: Causes, Symptoms, and Prevention ; Control Measures- Personal Protective Equipment (PPE), Ventilation and Engineering Controls ; Occupational Health Programs, Medical Surveillance, and Wellness Initiatives ;Case Studies on Occupational Health Challenges in Various Industries. ( 6 lectures) |

|   |   |
|---|---|
| <p style="text-align: center;"><b>UNIT III</b></p>        | <p><b>Industrial Safety Practices and Procedures</b> : Safe Work Practices and Procedures in Industrial Settings ; Fire Safety and Emergency Response Planning; Safe Handling and Storage of Hazardous Materials ; Machine and Equipment Safety: Guarding, Lockout/Tagout, and Maintenance; Electrical Safety Measures ; Confined Space Entry, Working at Heights, and Hot Work Safety; Real-life Case Studies on Industrial Accidents and Their Root Causes. ( 6 lectures)</p>   |
| <p style="text-align: center;"><b>UNIT IV</b></p>         | <p><b>Safety Management Systems (SMS) and Compliance</b> : Introduction to Safety Management Systems (SMS); Key Elements of SMS: Policy, Planning, Implementation, Monitoring and Review; Conducting Safety Audits and Inspections ;Incident Investigation and Reporting Protocols ; Occupational Safety Training and Communication Strategies ;Promoting a Culture of Safety and Compliance with Regulatory Standards ;Case Studies on Successful Implementation of SMS in Industries . ( 6 lectures)</p>  |
| <p style="text-align: center;"><b>UNIT V</b></p>          | <p><b>Emerging Trends in Industrial Health and Safety</b> : Contemporary Challenges in Industrial Health and Safety ; Sustainable and Green Practices in Industrial Safety; Technological Advancements and Their Impact on Workplace Safety; International Standards and Best Practices in Industrial Safety; Crisis and Risk Management in Industrial Environments . ( 6 lectures)</p>   |
| <p style="text-align: center;"><b>Reference Books</b></p> | <ul style="list-style-type: none"> <li>• ENVIRONMENTAL MANAGEMENT- UBEROI</li> <li>• ENVIRONMENTAL SAFETY AND HEALTH ENGINEERING- GAYLE WOODSIDE</li> <li>• ENVIRONMENTAL MANAGEMENT- S.GAUR</li> <li>• ENVIRONMENT &amp; HEALTH EFFECTS- ETIENNE DUBAIS</li> </ul>   |
