

ABOUT MLSU

Mohanlal Sukhadia University at Udaipur, Rajasthan (India) is a UGC recognized multi-faculty affiliating state university established by an Act in the year 1962 to cater the needs of higher education in Southern Rajasthan. The University has 33 departments under four constituent colleges. The university has more than 220 affiliated colleges with an enrollment of about 2.25 lakh students. As a mark of respect in the memory of late Sri Mohanlal Sukhadia the architect of modern Rajasthan, the university was renamed as Mohanlal Sukhadia University in 1984.

MLSU, Library

The University Library was constituted in 1962 and the Extension Library of the University of Rajasthan working in the Udaipur was merged into it in 1966. The College Libraries were created gradually with the establishment of the Colleges. In 1987 the Rajasthan Agricultural University was split up from the University and all the College Libraries of Agricultural wing became the part of the Rajasthan Agricultural University.

This library is member of INFLIBNET and DELNET, New Delhi, which has recently developed its WebPages. Readers can access our library record on the SUNET. The library also provides all possible information through Internet required by the research scholars. It is an e-library for browsing and accessing e-resources. It has recently been renovated and is now under CCTV Surveillance.

UDAIPUR

The city of lakes, Udaipur is a beautiful city situated in the lap of Aravalli Range of Rajasthan, India. Udaipur is regarded as one of the most romantic cities of the world and subsequently, also known as the "Venice of East". Udaipur has been capital of Mewar for centuries. It is the land of lake side scenic sights, hilltop fortresses, and luxuriant gardens with fountains. The surrounding Udaipur has many attractions such as world famous Jaisamand lake (50K.M.), Kumbhalgarh Fort (85K.M.), Ranakpur Jain Temple (90K.M.), Nathdwara (48K.M.) and Chittorgarh (105K.M.). The climate of Udaipur is very pleasant in the month of March. The temperature varies between "25-30 Degree Celsius".

INTRODUCTION

In the last decade, there has been a sharp rise in the number and complexity of e-resources in library collections. Moreover, use patterns are shifting from print to electronic materials. Because of the proliferation of e-resources and user preferences for the electronic format, these resources are becoming essential mainstays of any library collection. Today's e-resources consist of wide varieties of materials including journals, books, indexes, abstracts, encyclopaedias, reference books, aggregator databases, and full-text or partially full-text databases. As these resources change at a very rapid pace and as libraries continue to build larger collections of e-resources, finding ways to manage them effectively, from selection to licensing, is becoming a major challenge for librarians.

The pursuit of electronic resources by libraries was driven by the core values of library science. It is possible to recognize in Ranganathan's five laws of library science the motivation that drove libraries to incorporate electronic resources into services and collections. Paraphrased to better suit electronic resources, the laws read: resources are for use, every person his or her resource, every resource its user, save the time of the user, and the library is a growing organism.

Each technological development in library electronic resources during the 20th century was intended to make access to resources more direct, convenient, and timely for the user. The implementation of electronic resources made the library a growing organism as libraries adapted processes and reorganized staff repeatedly to accommodate the changes inherent in the use of constantly changing technology. The workshop is intended to unearth the search and discovery of e-resources gives and hand-on practical experience of exploring the world of knowledge of e-resources for Post Graduate and Social Science Researchers.

OBJECTIVES OF THE WORKSHOP

The objectives of the workshop are:

- To create a common understanding about e-resources that include e-journals, databases, datasets, standards etc.
- To develop strategies for digital rights management.
- To experience firsthand training on searching of various e-resources.
- To explore well designed techniques of storage of e-resources.
- To redefine the strategies for an effective working relationship between librarians and users community.

COURSE CONTENT

- Copyright and Licensing
- Open access resources- overview, identification and use
- Dynamics and evolution of e-resources
- Discovery of e-resources through WWW
- Digital Rights Management (DRM) techniques
- Preservation and maintenance of e-resources
- Future trends of e-resources

In addition to the above contents, there will be practical sessions incorporating multi-media presentations introducing each topic followed by discussions within the groups and individual exercises. During the workshop, the participants will build their own portfolios for storage and retrieval of e-resources and its management for their organizations.

EXPECTED PARTICIPANTS

The workshop will target working librarians of Social Science Colleges, Social scientists, Research scholars, working professionals, Post Graduate students from Social Science and Library & Information Science disciplines. 40 Participants (Selected and confirmed by MLSU) on first cum need basis. There will be no Course Fee for participation in the proposed workshop.

TENTATIVE DATE, DURATION & TIMING

Date : March 23, 2017 to March 25, 2017

Duration : 3 Days

Time : 10.30 A.M. –5.30 P.M. (1.30-2.30 Lunch break)

REGISTRATION FEE
